

What is claimed is

- SB
4/97
- 5 1. An active energy beam-curable composition which comprises (1) at least one compound having one oxetane ring and one hydroxyl group in the molecule, (2) at least one compound having one or more oxyrane rings in the molecule and (3) at least one compound which initiates cationic polymerization by irradiation of active energy beams.
- 10 2. A composition according to Claim 1, wherein the compound having one or more oxyrane rings in the molecule is an alicyclic epoxide.
- SB
4/97
- 15 3. A composition according to Claim 1, wherein the compound having one or more oxyrane rings in the molecule is an aromatic epoxide.
4. A composition according to claim 1 wherein (1) is 5 -
- 20 50 parts by weight and (3) is 0.01 - 20 parts by weight, both being on the basis of 100 parts by weight of total of (1) and (2), and (2) is remaining part.
5. A composition according to claim 4 wherein (1) is 10
- 25 - 40 parts by weight and (3) 0.1 - 10 parts by weight.
- 16
